ABOUT ME

I am a B.Tech Information Technology student aspiring to become a Full Stack Developer. With a strong foundation in front-end technologies like HTML, CSS, and JavaScript, I am currently advancing my skills in back-end development using java and database management. I am passionate about building interactive, user-friendly web applications and continuously learning new technologies. My goal is to develop efficient, scalable, and visually appealing web solutions that enhance user experience.

PROJECTS

ECommerce Website

Developed a responsive eCommerce website using HTML, CSS, and JavaScript. It includes product listings, a shopping cart, and a checkout system with dynamic features. JavaScript enhances interactivity with real-time cart updates and form validation.

Student Management System

Developed a Student Management System using Java, JDBC, and MySQL to perform CRUD operations on student records. Implemented exception handling for error-free database interactions. Presented the project at a college technical event and guided juniors on creating JDBC projects.
